

# Make a BUG Mobile

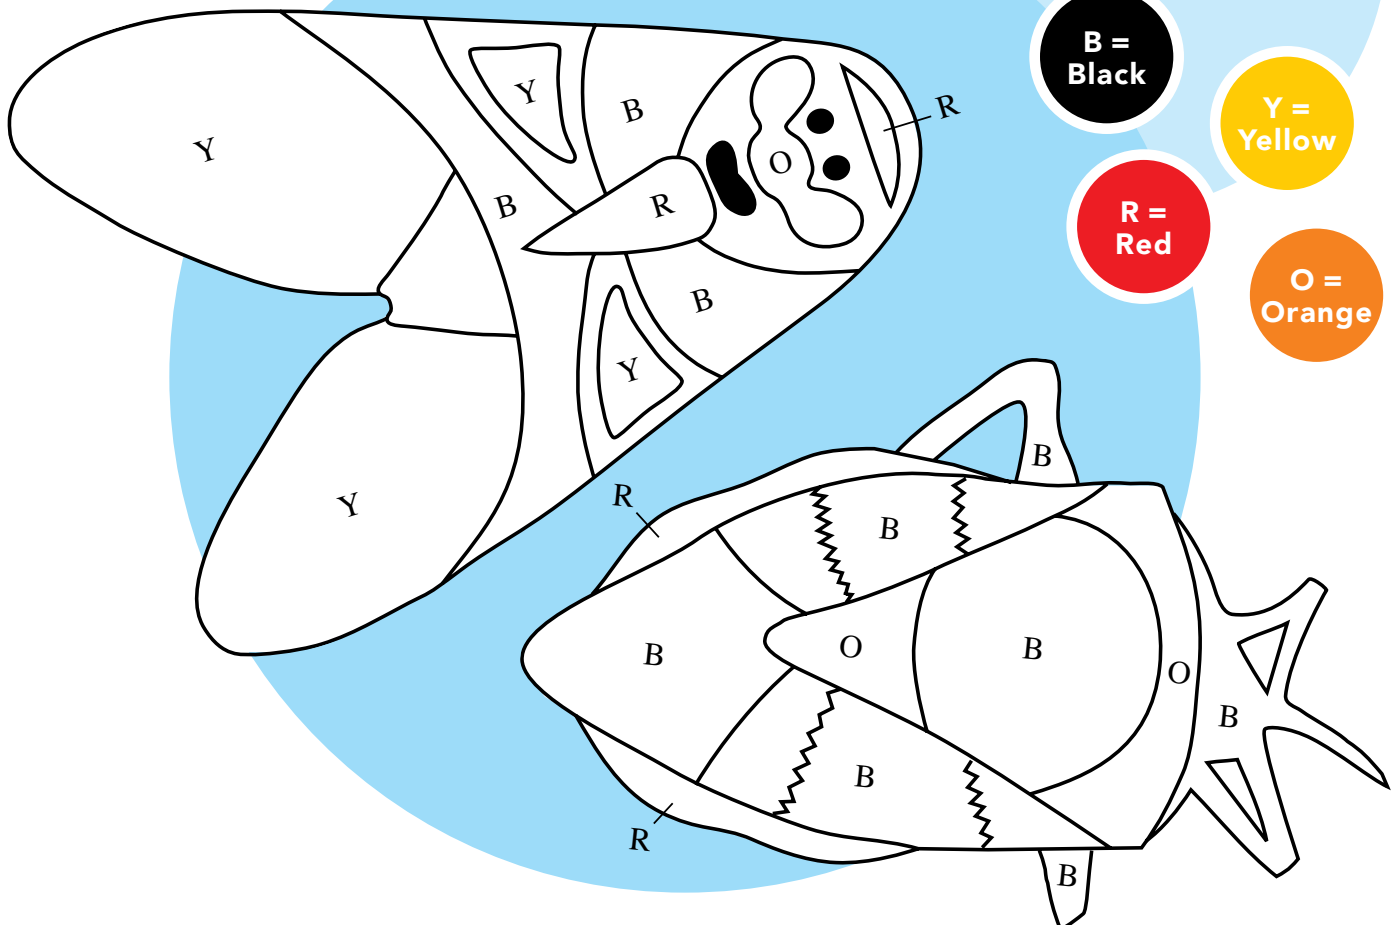

**Materials:** Construction paper, scissors, markers, string, 2 plastic straws

1. Take another look at the insects in this book. Choose several for your bug mobile.
2. Cut your insect shapes out of colored paper. Add details with markers. Or cut insect photos out of the *Zoobooks: Insects* issue and mount them on paper.
3. Tie your finished insects to the straws with string. Then tie the straws together as shown at left. You may need to slide the insects back and forth on the straws until the mobile is in balance.

**Hang your bug mobile in your room!**

## Beautiful Bugs

Insects can be quite beautiful. Some even come in bright colors. Use your crayons or markers to make these insects come alive with color. Use the code below to make the insects look true to life. Find more colorful insects on page 16.

# CAMOUFLAGED INSECTS

Hawk moth on tree bark.

How many insects can you find hiding on this page? Read about insect camouflage on page 16 of *Zoobooks: Insects*.
